

Rhode Island Airport Corporation

January 30, 2023

**ADDENDUM NO. 001
Request for Qualifications No. 33596
PVD Stormwater Conveyance System Improvements
Rhode Island T. F. Green International Airport**

Prospective proposers and all concerned are hereby notified of the following changes in the Request for Qualifications (RFQ) document related to RFQ No. 33596. These changes shall be incorporated in and shall become an integral part of the contract documents.

1. Within the last paragraph of the [General Project Description] scope of work section [on page 4], the last sentence mentions a stormwater collection system rehabilitation design to address the scope of activities referenced in Section 5.4.1 of the report. Please confirm that the activities referenced in Section 5.4.2 (Replace pipes in high and medium priority pipe sections) are not included as part of the scope of work for this project. **Section 5.4.2 is not included as part of the scope of work for this project.**
2. Please confirm if the Engineer of Record (EOR) is to provide RPR services. **Yes.**
3. Does the Prime Consultant need to have the required \$10M umbrella insurance at the time of selection? Or could we provide a letter from the insurance company stating that coverage can be obtained? **Proof of insurance shall be provided with the proposal. The selected firm is required to provide certificates of insurance in accordance with the standard insurance requirements as outlined in the RFQ at time of award.**
4. The proposal requirements list Professional References; however, the Submittal and Evaluation Criteria does not indicate how the references should be submitted. Please clarify if a list of references is sufficient. This would be in addition to the client contact information in 2c. **Yes, a list of references is sufficient.**
5. The Source Investigation of Dry Weather Stormwater System Flows report, section 5.4.1, states that two projects will be designed to keep construction costs under \$1M for each project. Please confirm if the repairs will be designed under one project or two. **Repairs in the scope of 5.4.1 will be one project.**
6. The Source Investigation of Dry Weather Stormwater System Flows report states that additional investigation, specifically Baseline Flow Metering and System-Wide Source Investigation is recommended. Please confirm if investigative services are to be included. **Yes, some additional investigative services are assumed to be needed to support the full design package.**
